

Certificate of Compliance

Restriction of Hazardous Substances (RoHS)

Avnet, Inc, certifies after thorough investigation and careful document control:

All materials, components, assemblies, equipment or other products or any parts of such products: are in full compliance with the requirements of the Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment, commonly known as the **RoHS 2 Directives**.

At this time Avnet, Inc. can report that none of the components from those suppliers that are in your products contain more than 1000 PPM of the restricted substances {100 PM for Cadmium) per the current RoHS 2 requirements.

Avnet, Inc. confirms that this certificate applies to all Avnet branded Assemblies and kits manufactured after January of 2013 and including future products.

This certificate is provided to customers and to authorities involved in the monitoring or enforcement of the Applicable Legislation for the purpose of providing information on the compliance with the Applicable Legislation.

This evaluation and summary was certified by:

A handwritten signature in black ink, appearing to read 'James A Jaksich', written over a horizontal line.
